

IQWORLD

DEVICE APPLICATION

API DOCUMENT

(Version 1.1.65)

**CREATED BY,
DEVANANDHAM . V
RIDSYS
19-04-25**

1. Device Exist -Checking

Endpoint : api/v1/none-auth/device/isexist?Android_id=9cbfdb0bdbfcd1a2

Params :

Android_id - Android device id

Example response:

```
{
  "isautoupgrade": false,
  "modelname": "CAN3201",
  "client_id": 2,
  "district_name": "North District",
  "password": "IQW0000021",
  "city_name": "Mangan",
  "apkVersion": "1.1.65_Vertical",
  "state_name": "SIKKIM",
  "isscreenshot": false,
  "clientname": "viji qc",
  "state_id": 30,
  "apk": "IQworld1.1.65_Vertical.apk",
  "apkUpdated": "2025-04-09T15:28:43",
  "device_status": true,
  "pincode": "null",
  "orientation": "9:16",
  "version": "BASIC",
  "device_info": false,
  "client_status": true,
  "locationid": 426,
  "location": "MANGAN",
  "district_id": 503,
```

```

"clientusername": "vijiqc",
"status": "success",
"username": "IQW0000021",
"city_id": 2137
}

```

isautoupgrade	Boolean	OTA Update
modelname	String	Model name
client_id	Int	Id
district_name	String	Name of the District
password	String	Password of the Client
city_name	String	City name
apkVersion	String	Version of Apk
state_name	String	Name of the State
isscreenshot	Boolean	Device with Current Location
clientname	String	Client name
state_id	Int	State Id
apk	String	Apk file name
apkUpdated	String	Time of Apk installation
device_status	Boolean	Status of Device (Online / Offline)
pincode	String	Pincode
orientation	String	9:16 -> Vertical 16 : 9 -> Horizontal
version	String	Version for Device (Basic / Pro)

device_info	String	Hardware Info - true means RAM , ROM appears on screen
client_status	Boolean	Activation - Success -.> True Else false
locationid	Int	Location id
location	String	Location
district_id	Int	Id of the District
clientusername	String	Username for Client
status	String	Status of the Device
username	String	Device username
city_id	Int	City id

2 . Signin

Endpoint : api/auth/signin? {
 "username": "inbox",
 "password": "Pass@123"
 }

Params :

Username - username for device

Password - password

Example response:

```
{
  "id": 10,
  "username": "inbox",
  "email": "inbox@gmail.com",
  "roles": [
    "ROLE_CLIENT"
  ], "accessToken":
  "eyJhbGciOiJIUzUxMiJ9.eyJzdWIiOiJ2aWppcWMiLCJpYXQiOiJlNDQ5NzU5MjQsImV4cCI6MTc0NTA2MjMyNH0.gW8BOcghGYb-Ig4NB-VJoyCFMGGKR
  Va82j_OfoSqsJkz1WpQl3tCaApZlcPDO8L3XW1nH0InuQUW-rszmLSQuQ",
  "tokenType": "Bearer"
}
```

accessToken	String	You include it in API requests to prove your identity and get access to protected resources (like a user profile, list of posts, etc.).
tokenType	String	You usually send it in the request header like this:
username	String	Username for client
email	String	Email for client
id	Int	Id
role	String	Role → Admin / Customer / Distributor

3 . State List Api

Endpoint : api/v1/none-auth/state/all?

Example response:

```
[
{
  "id": 11,
  "statename": "GOA",
  "code": "GA",
  "country": {
    "id": 1, "countryname": "INDIA"
  }
}
]
```

id	Int	Id
Statename	String	Name of the State
country	String	Name of the Country object
id	Int	id
countryname	String	Name of the Country

4 . Media List Api

Endpoint : api/v1/playlist/mediafilebyclientforsplit? clientname=vijiqc
&state_id=30&city_id =2137 &androidid =9cbfdb0bdbfcd1a2& deviceid
=IQW0000021&vertical=9:16

Params :

Clientname - Name of client
State_id - id of State
city_id =Id of City
androidid - Android id
Deviceid - Device Unique Id
vertical=9:16 (Vertical / Horizontal)

Example response

```
{
  "start_time": "null",
  "updated_time": "2025-04-09T15:44:44",
  "layout_list": [
    {
      "zonelist": [
        {

}

```

updated_time	String	Time for playlist creation
--------------	--------	----------------------------

		and updation
Order_id	Int	id
Isactive	Boolean	Active of Content
Filename	String	File name of content
Duration	String	Time taken for showing this content
Mediafile_id	Int	Mediafile id
Page_count	Int	Page count
Url	String	Url - Content
ismute	Boolean	Mute or Immute
x	String	X Position
y	String	Y Position
width	String	Width
height	String	Height
zone_duration	String	Time taking for showing that Zone
Rows	String	Row
cols	String	Col
isvertical	Boolean	Vertical / Horizontal
layout_duration	Int	Time taking for showing that Layout
layoutid	Int	Layout id
zonecount	Int	Total zone count
playlist_name	String	Name of playlist

content_type	String	Content type
media_type	String	Media type
playlist_id	Int	Playlist id
name	String	Scrolling message name
fncolor	String	Font colour
bgcolor	String	Background colour
fontname	String	Font name
message	String	Messege - scrolling message
logo	String	Logo
scrlspeed	String	Speed of the scrolling message

5 . Checking Playlist Api

Endpoint : api/v1/playlist/checkplaylist?playlist_id=0&updation_date=&adrid=

Params :

Playlist_id - id for playlist

Updation_date - update time for playlist

Madrid - android id

Example response

```
{
  "Status": "true",
  "call_time": "null"
}
```

Status	Boolean	If available next default content means false showing
call_time	String	Next available Schedule time

5 . Checking Playlist Api

Endpoint : api/v1/device/checkonline?adrid =&clientname =vijiqc

Params:

adrid - android id

Clientname - Client name

No **response** this API

6 . OTA Update

Endpoint : api/v1/none-auth/getotaapk?username =

Params:

Username - Device id

Example response

{

```

"features": [
  "OTA Optimization "
],
"start_time": "21:00:00",
"ver": "1.1.65",
"end_time": "22:00:00",
"apk": "IQworld1.1.65_Vertical.apk",
"url": "https://ds.iqtv.in/iqsignage/ota/IQworld1.1.65_Vertical.apk"
}

```

start_time	String	Start time for OTA update
ver	String	Version of apk file
end_time	String	End time for OTA update
apk	String	Apk file name
url	String	Url path
features	List	Feature

6 . Server Details

Endpoint : /api/server/getserverdetails?

Example Response

```

{
  "id": 1,
  "domain_name": "ds.iqtv.in",
  "server_ip": "103.183.47.142",

```

```
"linkurl": "https://ds.iqtv.in",  
"application_url": "https://ds.iqtv.in:8080/iqworld/",  
"isactive": true,  
"application_name": "iqworld",  
"application_port": "8080",  
"createddate": "2024-04-29T13:25:02",  
"updateddate": null  
}
```

7. Device Model Details

Endpoint : api/v1/none-auth/getdeviecemodels

Example Response

```
[  
  {  
    "id": 1,  
    "modelname": "CAN3201",  
    "price": "100",  
    "size": "32",  
    "isactive": true,  
    "modelid": 1,  
    "imageurl": "https://ds.iqtv.in/iqsignage/models/CAN3201.png",  
    "versionid": null,  
    "version": null,  
    "isselect": false,  
    "count": 1  
  },  
]
```

id	String	id
modelname	String	Modelname
price	String	Prize
size	String	size
isactive	Boolean	Status of device
count	Int	Count of the device

8 . Update device apk

Endpoint:

api/v1/none-auth/updatedeviceapk?android_id=IQW0000011&version=1.1.26&isvertical=1

Example Response

```
{
  "message": "Device registered Already",
  "status": "Failed"
}
```

9 . Logout Device

Endpoint : /api/v1/device/logout?deviceid=

Params

Deviceid = Device unique id

Example Response

```
{
  "message": "Logout successfully!"
}
```

messege	String	Message for logout device
---------	--------	---------------------------

10 . Getting Current time

Endpoint : /api/v1/none-auth/getcurrenttime ?

Example response

2025-04-18T20:06:10.414

11 . Getting Current time by zone

Endpoint : api/v1/none-auth/getcurrenttimebyzone?deviceid=IQW0000021

Params :

Deviceid : Device unique id

Example response

2025-04-18T20:06:10.414

12 . Getting get city by district

Endpoint : api/v1/none-auth/getcitybydistrict?districtname=Anantapur&districtid=null

Params :

Districtname - District

District id - id

Example response

```
[
  {
    "id": 2136,
    "cityname": "Chungthang",
    "district": {
      "id": 503,
      "name": "North District",
      "state": {
        "id": 30,
        "statename": "SIKKIM",
        "code": "SK",
        "country": {
          "id": 1,
          "countryname": "INDIA"
        }
      }
    }
  },
  {
  }
]
```

id	Int	Id
cityname	String	City name
district	String	District
id	Int	id
name	String	Name

state	object	State details here
id	Int	Id
statename	String	State
country	object	Country details
id	Int	Id
countryname	String	Country name

13 . Get District by State

Endpoint :

<http://ds.iqtv.in:8082/api/v1/none-auth/getdistrictbystate?statename=ANDHRA%20PRADESH&stateid=null>

Params

Statename - Statename

Stateid - id of state

Example response

```
[
  {
    "id": 4,
    "name": "Anantapur",
    "state": {
      "id": 2,
      "statename": "ANDHRA PRADESH",
      "code": "AP",
      "country": {
        "id": 1,
        "countryname": "INDIA"
      }
    }
  },
]
```

Id	Int	Id
name	String	Name
state	List	State Object
id	Object	Id
statename	String	Statename
country	Object	Country Object
countryname	String	Country name
